Dear Sir/Madam,

PROPOSAL: SHED FOR STORAGE AND WC

LOCATION: SHELLBROOK PASTURES, KNOLTON, BRYN, OVERTON, WREXHAM

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 17th September 2020.

We have no objection to the proposed development as submitted and provide the following advice.

Site of Special Scientific Interest

We have considered the submitted documents in support of the above application. Based on the information submitted, we consider that the proposed development is not likely to damage the features for which Shell Brook Pastures SSSI is of special interest.

From a protected site prospective we have no objection to the placement of the proposed shed outside of Shell Brook Pastures SSSI as indicated on the submitted plan.

Foul Drainage

We note the proposal is to connect the foul drainage to a compost toilet. We do not have a record of this compost toilet being registered with us.

The Applicant should also be aware that to operate a private sewerage system, they will need to apply for an environmental permit or register an exemption with us. Septic tanks and small sewage treatment works may be registered as exempt from the requirement to obtain an environmental permit if certain criteria are met. Please note, should a permit be required, further information may be required as part of that application and the Applicant is therefore advised to hold pre-application discussions with our Permitting Team on 0300 065 3000, at the earliest opportunity, to try to ensure that there is no conflict between any planning

permission granted and the permit requirements. It is important to note that a grant of planning permission does not guarantee that a permit will be granted, should a proposal be deemed to be unacceptable (either because of environmental risk or because upon further investigation, a connection to mains sewer was feasible). The Applicant should ensure that they have all the required permissions, consents, permits and any other approvals in place prior to commencement of works on the site.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice for the Developer

Site of Special Scientific Interest

Consent maybe required under Section 28 of the Wildlife and Countryside Act and we recommend contacting our Environment Team on ian.hughes@cyfoethnaturiolcymru.gov.uk for any work within the SSSI.

Environmental Management

All works at the site must be carried out in accordance with PPG6: 'Working at construction and demolition sites' which are available on the following website:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-andreplacement-series/guidance-for-pollution-prevention-gpps-full-list/>

The activity of importing waste into the site for use as, for example hardcore, must be registered with Natural Resources Wales as an exempt/permittable activity under the Environmental Permitting Regulations 2016. The developer should contact Natural Resources Wales to discuss the necessity for an exemption/permit for any material imported to and exported from the site.

If during construction/excavation works any contaminated material is revealed, then the movement of such material either on or off site should be done in consultation with Natural Resources Wales. Any waste excavation material or building waste generated in the course of the development must be disposed of satisfactorily and in accordance with Section 34 of the Environmental Protection Act 1990. Carriers transporting waste from the site must be registered waste carriers and movement of any Hazardous Waste from the site must be accompanied by Hazardous waste consignment notes.

If you have any queries on the above, please do not hesitate to contact us.

Yours faithfully

Ruth Prichard
