Annwyl Syr/Madam / Dear Sir/Madam,

**BWRIAD / PROPOSAL: CODI 3 DIM COD GWERSYLLA A MYNEDIAD A PHARCIO
NEWYDD / ERECTION OF 3 NO. CAMPING PODS AND NEW ACCESS AND PARKING**

**LLEOLIAD / LOCATION: LAND NEXT TO WHITE GATE COTTAGE, LLANARMON, DC
WREXHAM, LL20 7LD**

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 16/03/2021

We have significant concerns with the proposed development as submitted. We recommend you should only grant planning permission if the following requirement is met. Otherwise, we would object to this planning application.

Requirement 1: Flood Risk - The Planning Authority to be satisfied that there are overriding reasons for considering for granting the application contrary to national planning policy on development and flood risk. Satisfactory evidence must then be provided to demonstrate that the risks and consequences of flooding can be managed to be acceptable level, in accordance with TAN15.

Flood Risk

The planning application proposes highly vulnerable development, the erection of 3 no. camping pods and new access and parking. Our Flood Risk Map confirms the site to be within Zone C2 of the Development Advice Map (DAM) contained in TAN15.

We refer you to Section 6 of TAN15 and the Chief Planning Officer [letter](#) from Welsh Government, dated 9 January 2014, which affirms that highly vulnerable development and emergency services should not be permitted in Zone C2 (paragraph 6.2 of TAN15). The justification tests in paragraph 6.2 of TAN15 do not apply to highly vulnerable development or emergency services in Zone C2.

Requirement 1: Flood Risk - The Planning Authority to be satisfied that there are overriding reasons for considering for granting the application contrary to national planning policy on development and flood risk. Satisfactory evidence must then be provided to demonstrate that the risks and consequences of flooding can be managed to be acceptable level, in accordance with TAN15.

In the first instance, your Authority should make a planning policy decision on the application. Therefore, unless we receive written confirmation from your Authority that you believe there are overriding reasons to consider granting planning permission, despite the site's location within Zone C2, *we do not intend to review the submitted flood consequences assessment (FCA)* and we would advise that your Authority should refuse the planning application on planning policy grounds.

The decision as to whether a development should be considered contrary to TAN15 policy is entirely a matter for your Authority. However, if you provide overriding reasons and require our advice, we request sufficient time to review the applicant's FCA. We will then provide you with technical advice on the acceptability of flooding consequences in accordance with Appendix 1 of TAN15.

If the FCA fails to demonstrate that the consequences of flooding can be acceptably managed over the lifetime of the development, then we would object to the application.

Please inform us, in accordance with advice in paragraph 11.7 of TAN15, if you are minded to grant permission for the above application contrary to our advice and allow sufficient time for further representations to be made before any consent is granted.

Finally, as your Authority will be aware, under the Town & Country Planning (Notification) (Wales) Direction 2012 and more specifically Category I relating to Flood Risk Area Development, where the Planning Authority is minded to grant permission, there is a requirement to refer applications for emergency services or highly vulnerable development within Zone C2 to Welsh Government.

Protected Sites

We note the application site is within the catchment of the River Dee and Llyn Tegid Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphate levels for all river SACs across Wales. As part of this package, we issued a [Planning Position Statement](#), in which we advised that any proposed development that might increase the amount of phosphate within a river SAC catchment could lead to damaging effects to the SAC. Therefore, such proposals should be screened through a Habitats Regulations Assessment (HRA), to determine whether they are likely to have a significant effect on the SAC. We also issued [Interim Planning Advice](#), which gives specific advice in respect of foul drainage arrangements for new developments.

We note from the information submitted that the development has the potential to increase the volume or concentration of wastewater and associated phosphate levels being

discharged from the site. As such, we refer you to our [Interim Planning Advice](#) and confirm that provided this guidance is followed and you are able to conclude that the development is not likely to have a significant effect on the SAC, we have no objection to the proposal. However, should you conclude that the proposed development is likely to have a significant effect on the SAC, please consult us on your Appropriate Assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully,

Rhys Jones
