Dear Sir or Madam

Thank you for the consultation on this application for conversion of the historic property at this location.

The building is located within the Wrexham Conservation Area and is currently unrecorded on the Historic Environment Record. The building retains original fabric and features which are of at least local architectural and historical importance within the townscape and the frontage adds character to the street scene. The structure appears Georgian from the outside and brick built, but may contain earlier elements inside. There will inevitably be some modernisation and change to the historic internal layout and this will need to be recorded prior to conversion.

We would therefore recommend that an appropriate level of building recording is completed to record the current structure in its original form and before important detail is lost during clearance and renovation. In this case we would advise that a Level 2 survey is completed in accordance with the Planning Policy Wales (Dec 2018) and TAN 24 (May 2017) guidance and an appropriate condition is supplied below. The Level 2 survey would include a detailed photographic survey, written descriptive survey, phased plans of building development and a measured survey using annotated architects plans.

The condition in this case would be:

Suggested planning condition to facilitate a programme of historic building recording, the equivalent of an Historic England Level 2 building survey, in order to allow an adequate analytical record of the buildings to be made prior to alteration

No development shall take place until a programme of building recording and analysis, equivalent to an Historic England Level 2 building survey, has been secured and implemented, in accordance with a brief issued by the local planning authority and a written scheme of investigation which has been submitted and approved in writing by the local planning authority. The survey will be completed by a professional archaeological contractor. The programme of building analysis and recording must meet the standards laid down by the Chartered Institute for Archaeologists in their Standard and Guidance for the archaeological investigation and recording of standing buildings or structures.

A copy of the resulting report should be submitted to the Local Planning Authority and the Development Control Archaeologist, Clwyd-Powys Archaeological Trust (The Offices, Coed y Dinas, Welshpool, Powys, SY21 8RP Email: mark.walters@cpat.org.uk Tel: 01938 553670). After approval by the Local Planning Authority, a copy of the resulting report should also be sent to the Historic Environment Record Officer, Clwyd-Powys Archaeological Trust for inclusion in the regional Historic Environment Record and a copy of the report and whole project archive should also be sent to the National Monuments Record, RCAHMW

Reason:

To allow an adequate analytical record of the buildings to be made, before they are converted, to ensure that the buildings origins, use and development are understood and the main features, character and state of preservation are recorded.

I have attached a brief for the Level 2 survey and guidance on sources of archaeological contractors who may wish to tender for this work. The chosen archaeological contractor will need to submit a WSI (written scheme of investigation) document to me for approval before they can commence works on site.

Please contact me if you wish to discuss this advice or require more information.

Kind regards

Mark Walters
