Dear Mr Phillips,

RE: GCN Licence Timescales

Following on from submission of the planning application for the extension to the Magellan factory on Llay Industrial Estate (P/2021/0056), please see below an amendment to the timescales included in the Protected Species Management Plan (56000/R2/Rev1).

We are proposing the following timescales.

- GCN Licence submitted to NRW 9th April 2021 upon award of planning permission;
- GCN licence received by 21st May 2021 at earliest (based on 30 working days);
- Amphibian fencing and receptor site installed over c. 3 day period during working week. Estimated to be complete by 26th May 2021;
- 30 consecutive nights trapping and translocation commences 27th May 2021 with any GCN moved to receptor area, completed 26th June 2021 (weather permitting);
- Establish mitigation area
- Area declared free of GCN and construction commences on 28th June 2021;
- Fencing between temporary receptor site and mitigation area opened up, 26th June 2021. This will allow any GCN to move south west to the former Llay Colliery which is known to support GCN.

Yours sincerely

F. A. MacCormack
