Annwyl Syr/Madam / Dear Sir/Madam,

BWRIAD / PROPOSAL: CODI ANNEDD AR WAHAN. / ERECTION OF DETACHED DWELLING.

LLEOLIAD / LOCATION: WYNONA STATION ROAD, ROSSETT, WREXHAM

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 15/12/2020

We have significant concerns with the proposed development as submitted. We recommend you should only grant planning permission if the following requirement is met. Otherwise, we would object to this planning application.

Requirement: Flood Risk - The Planning Authority to be satisfied that there are overriding reasons for considering for granting the application contrary to national planning policy on development and flood risk. Satisfactory evidence must then be provided to demonstrate that the risks and consequences of flooding can be managed to be acceptable level, in accordance with TAN15.

Flood Risk

The planning application proposes highly vulnerable development (Erection of Detached Dwelling). Our Flood Risk Map confirms the site to be within Zone C2 of the Development Advice Map (DAM) contained in TAN15.

We refer you to Section 6 of TAN15 and the Chief Planning Officer letter from Welsh Government, dated 9 January 2014, which affirms that highly vulnerable development and emergency services should not be permitted in Zone C2 (paragraph 6.2 of TAN15). The justification tests in paragraph 6.2 of TAN15 do not apply to highly vulnerable development or emergency services in Zone C2.

In the first instance, your Authority should make a planning policy decision on the application. Therefore, unless we receive written confirmation from your Authority that you believe there are overriding reasons to consider granting planning permission, despite the site's location within Zone C2 we do not intend to comment on the risks and consequences of flooding and we would advise that your Authority should refuse the planning application on planning policy grounds.

The decision as to whether a development should be considered contrary to TAN15 policy is entirely a matter for your Authority. However, if you provide overriding reasons and require our advice, we advise you there is no flood consequences assessment (FCA) supporting the planning application and this will be required to assess compliance with test iv (in paragraph 6.2). We will then provide you with technical advice on the acceptability of flooding consequences in accordance with Appendix 1 of TAN15.

If the FCA fails to demonstrate that the consequences of flooding can be acceptably managed over the lifetime of the development, then we would object to the application. Please inform us, in accordance with advice in paragraph 11.7 of TAN15, if you are minded to grant permission for the above application contrary to our advice and allow sufficient time for further representations to be made before any consent is granted.

Finally, as your Authority will be aware, under the Town & Country Planning (Notification) (Wales) Direction 2012 and more specifically Category I relating to Flood Risk Area Development, where the Planning Authority is minded to grant permission, there is a requirement to refer applications for emergency services or highly vulnerable development within Zone C2 to Welsh Government.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice for the Developer

Works near Watercourse / Construction or Demolition sites

Due to the proximity of the site to watercourses, all works at the site must be carried out in accordance with GPP5 PPG6: 'Works in, near or over watercourses' and 'Working at construction and demolition sites' which are available on the following website: /

Pollution Prevention

During the construction phase you should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages.

For further guidance please refer to GPP 5, PPG 6 and GPP22 at the following link:
<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Rhys Jones
