Annwyl Syr/Madam / Dear Sir/Madam,

PROPOSAL: AGRICULTURAL BUILDING FOR STORAGE OF FARM MACHINERY

LOCATION: CINDERS FARM, CINDERS, RUABON, WREXHAM

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 02/12/2020.

We have no objection to the proposed development as submitted and provide the following advice.

Pollution Prevention

Site operators should ensure that there is no possibility of contaminated water entering and polluting surface or groundwater.

Only clean, uncontaminated surface water (rainwater runoff) should be allowed to drain to surface water such as ditches or watercourses. Any areas that have the potential to be contaminated should drain towards the appropriate dirty water collection facility.

In accordance with the Environmental Permitting (England and Wales) Regulations, pollution of the nearby watercourse must be prevented both during the operational and construction phase. Runoff from muddy areas can cause siltation of watercourses which can smother habitats and damage fish further downstream. Please ensure that adequate silt management is in place.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice for the Developer

Agriculture

The facilities must comply with the Water Resources (Control of Pollution) (Silage and Slurry) (Wales) Regulations 2010. Site operators should ensure that there is no possibility of contaminated water entering and polluting surface or groundwater.

Please refer to the link below for further information:

<http://naturalresources.wales/guidance-and-advice/business-sectors/farming/good-farming-practice/?lang=en>

Pollution Prevention

During the construction phase you should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages.

For further guidance please refer to GPP 5 and PPG 6 at the following link:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Waste Produced During Construction

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provide information on how to classify waste and register as a waste carrier or hazardous waste producer:

<https://naturalresources.wales/permits-and-permissions/waste/?lang=en>

<https://naturalresources.wales/permits-and-permissions/waste/waste-permits/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Garmon Lewis
