Hi Rob

I have compared the chemical test results against the current General Acceptance Criteria (GAC) values and these all meet the acceptable values for residential use with plant up-take. As such soils may be retained or re-used in garden areas to domestic houses.

Steve

**Subject:** Site at Cefn Mawr

Afternoon Steve

Further to our telcon just now..

I'm in the process of discharging a condition on a planning up for a small site of 4 dwellings at Cefn Mawr where the requirement is for a verification report that the site soils that have been imported are 'clean, chemically tested topsoil' to a depth of 200 or 300mm depth depending on area.

I've been to the site and verified the depth etc but I'm not a soil scientist (I'm a Landscape Architect). I've been provided with the report attached with the soil analysis (that means little to me in its format) but note the matter in the report 'Reuse of Material' and need to demonstrate to the local authority (Wrexham) that the imported soils are satisfactory.

Any way, I wonder if you can help me?

My client here is a chap called Chris Gregory (magregory construction). My direct nr is 01829 271570

Look forward to hearing from you and thanks for your assistance

Regards

Rob Rodger
