Annwyl Syr/Madam / Dear Sir/Madam,

**BWRIAD / PROPOSAL: CONVERSION OF ENGINE HOUSE INTO A TWO BEDROOM
SELF CONTAINED ANNEXE FOR TOURIST ACCOMMODATION**

**LOCATION: THE ENGINE HOUSE, BRONYDD QYUARRY ROAD, GLYN CEIRIOG,
LLANGOLLEN**

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 30/10/2020.

We have no objection to the proposed development as submitted and provide the following advice.

Protected Species

We note that the bat report submitted in support of the above application (Richards Moorehead & Laing Ltd, June 2020) has identified that bats are present (foraging and commuting) at the application site. From the information submitted, we consider that the proposed development represents a lower risk for bats, as defined in our guidance document '*Natural Resources Wales Approach to Bats and Planning (2015)*'. Bats and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017.

As this is a lower risk case for bats, we consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range.

Furthermore, we advise that the proposed development is not likely to harm or disturb bats or their breeding sites and resting places as detailed in the report.

We would welcome the inclusion of the report in the 'approved list of plans / documents' condition within the decision notice should consent for the project be granted in order to secure the recommendations in the report.

Please consult us again if any further information shows that this is no longer a lower risk case.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice for the Developer

Foul Drainage

The developer/applicant should ensure that the existing septic tank has sufficient capacity to accommodate any increase in flows from the proposed development. The Applicant should note, it is a legal requirement to apply for an environmental permit or register an exemption with us. Septic tanks and small sewage treatment works may be registered as exempt from the requirement to obtain an environmental permit if certain criteria are met. Please note, should a permit be required, further information may be required as part of that application and the Applicant is therefore advised to hold pre-application discussions with our Permitting Team on 0300 065 3000, at the earliest opportunity, to try to ensure that there is no conflict between any planning permission granted and the permit requirements. If the Applicant already holds an exemption / permit, they should check whether the proposed increase in flows would require a further application to be made for a new / varied permit. It is important to note that a grant of planning permission does not guarantee that a permit will be granted, should a proposal be deemed to be unacceptable (either because of environmental risk or because upon further investigation, a connection to mains sewer was feasible). The Applicant should ensure that they have all the required permissions, consents, permits and any other approvals in place prior to commencement of works on the site.

More information, including a step by step guide to registering and the relevant application forms are available on our [website](#). Where private sewage treatment/disposal facilities are utilised, they must be installed and maintained in accordance with British Standard 6297 and Approved Document H of the Building Regulations. We also refer the Applicant to Guidance for Pollution Prevention 4 on the [NetRegs website](#), which provides further information.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Garmon Lewis
