a Bank Holiday. Outside these times, any works which are audible beyond the site boundary have the potential to cause unreasonable disturbance to neighbouring premises.

The applicant is advised that the Council has the option to control construction noise by serving a Control of Pollution Act 1974, Section 60, Notice where deemed necessary, and failure to comply with such a Notice can result in prosecution.

The applicant should adhere to the times given above wherever possible. For further information and advice regarding construction noise please contact the Council's Housing and Public Protection Department on 01978 315300.

Burning of waste generated from construction activities is not considered to be an appropriate method of disposal and action may be taken as follows:

- Under the Environmental Protection Act 1990 anyone found disposing of construction site waste by burning is likely to be in breach of their duty of care with regard to waste disposal;
- Under the same Act an abatement notice may be served where smoke is judged to be causing a nuisance to neighbouring properties. Failure to comply with the requirements of the notice can result in prosecution;
- Under the Clean Air Act 1993 it is an offence for a commercial activity to burn anything that gives rise to dark smoke.

To prevent offences under the above named Acts there should be no bonfires on the site, to include the prohibition of the burning of cleared vegetation. The applicant should contact the Council's Environment and Planning Department on 01978 315300 for further advice and information.

The Applicant is advised that under the Environmental Protection Act 1990, dust from construction and/or demolition activities can be judged to be causing a statutory nuisance to neighbouring properties. A legal notice can be served requiring that any dust nuisance is abated and failure to comply with the requirements of the notice can result in prosecution. The applicant should contact the Council's Housing and Public Protection Department on 01978 315300 for further advice and information.

From the 7th of January 2019 any new development of more than one dwelling or that involves construction work of more than 100m² is required to

obtain approval from the SuDS Approving Body (SAB) prior to the commencement of those construction works. Furthermore the surface water drainage systems serving proposals of greater than one property will be subject to adoption by the SAB and must be constructed in such a manner as to be compliant with new national statutory standards. Given the potential implications for your development, in particular it's layout, it is essential that you satisfy yourself as to whether SAB approval is required, and if so, that you can demonstrate that the surface water drainage arrangements will be compliant with the national standards. While it is possible to seek planning permission in isolation of seeking SAB approval we emphasis the risk in pursuing such an approach. The earlier it can be determined that your proposals are compliant with the new standards the less chance of delay, wasted effort and costs for all parties involved.

These comments are made in advance of any formal response from either the SAB or the Lead Local Flood Authority through the normal planning application consultation process to allow your early consideration of the implications of the new legislative requirements for your proposed development.

Further details of the SAB, the new national standards, the pre-application advice service and the application for approval process can be found on the Wrexham CBC's SAB webpage:
https://www.wrexham.gov.uk/english/planning_portal/sab/sab.htm or by contacting the SAB Team directly at SAB@wrexham.gov.uk .
