P/2019/0549 – 40 HEOL LLEWELYN, COEDPOETH

Further to my Memo dated 13 December 2019 and your email providing a copy of the letter report prepared by GroundSolve dated 16 July 2020 which assesses the contamination status of the glacial till at the site, I can confirm that the assessment and proposed remediation strategy is sufficient, although as a matter of record a full plan of the site investigation works should be provided (the plan provided on p5 is incomplete). On provision of the plan I can recommend that Condition 7 is discharged.

A verification report will be required in line with the remediation requirements and therefore until this is provided Condition 8 should not be discharged.

A handwritten signature in black ink, appearing to read 'Angela Guy'.
