For the attention of Matthew Phillips

Dear Matthew,

**BWRIAD / PROPOSAL: INSTALLATION OF ADDITIONAL EXHAUST FLUE
STACK ON THE EXISTING BOILER HOUSE (MAXIMUM STACK
HEIGHT OF 19 METRES ABOVE LOCAL GROUND LEVEL - 6
METRES ABOVE EXISTING ROOF HEIGHT)**

LLEOLIAD / LOCATION: MONDELEZ UK, WREXHAM

Thank you for consulting Natural Resources Wales (NRW) about the above, which was received on 03/03/2020.

We have no objection to the application as submitted and provide the following advice.

Protected Sites and Air Quality

We note the Air Quality Impact Assessment (Mondelez UK Production Ltd, Chirk Site, Air Quality Impact Assessment, Project Environmental Solutions, December 2019) and we consider that in terms of the planning process the emissions and depositions at the designated sites assessed to be not significant. However, this is without prejudice to any other regulatory regime that this development may need to comply with.

Other Matters

Our comments above only relate specifically to matters that are listed in our 'Consultation Topics' document (September 2018) which is published on our website: (<https://cdn.naturalresources.wales/media/686847/dpas-consultation-topics-august-2018-eng.pdf?mode=pad&rnd=131819256840000000>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Advice for the Developer:

Environmental Permitting

The applicants have applied to NRW for a Medium Combustion Plant (MCP) permit for the new boiler that will be subject to determination by our permitting team.

Pollution Prevention

During the construction and operational phase you should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages.

For further guidance please refer to GPP 5 and PPG 6 at the following link:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Waste produced during construction

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provide information on how to classify waste and register as a waste carrier or hazardous waste producer:

<https://naturalresources.wales/permits-and-permissions/waste/?lang=en>

<https://naturalresources.wales/permits-and-permissions/waste/waste-permits/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

Yn gywir / Yours faithfully,

Daniel Davies
