

Storm proof casement window (Outside)

Storm proof casement window (Inside)

Widows will be of various sizes, but the style will remain the same.

There will be no wooden sills (flush), as the base of the window opening will be finished with brick sills.

All widows will be glazed with toughened glass, where the window is within 800mm of the finished floor level.

Window Colour

The windows and the other exterior wood work will be painted grey, as per the image below.

External doors

Front door

This will be a glazed wooden French door, as per the style in the image below. It will be painted grey, as per the other exterior wood work.

Back door

This will be a partially glazed wooden stable door, as per the style in the image below. It will be painted grey in line with the other exterior wood work.

Roof Light Windows

These will be conservation type roof windows, in the style of the image below. It will be a low profile window, to enable it to blend seamlessly with the slate roof.
