Our Ref: PLA0043630
Your Ref: P/2019/0516

Dear Sirs,

Site: P R Pugh, Miners Road, Llay Industrial Estate, Llay
Development: Extension to power plant and associated infrastructure

We refer to your planning consultation relating to the above site, and we can provide the following comments in respect to the proposed development.

SEWERAGE

The proposed development site is crossed by a 225mm public foul water only sewer. Please see copy of indicative sewer plan attached. No operational development is to take place within 3 metres either side of the centreline of the sewer. We request that prior to commencing any operational development the location of this asset is determined. If operational development is likely to commence within 3 metres either side of the centreline of the sewer please stop works and contact us. This sewer may be able to be diverted under Section 185 of the Water Industry Act 1991.

Notwithstanding this, we would request that if you are minded to grant Planning Consent for the above development that the **Conditions and Advisory Notes** listed below are included within the consent to ensure no detriment to existing residents or the environment and to Dwr Cymru Welsh Water's assets.

Conditions

No surface water and/or land drainage shall be allowed to connect directly or indirectly with the public sewerage network

Reason: To prevent hydraulic overloading of the public sewerage system, to protect the health and safety of existing residents and ensure no pollution of or detriment to the environment

Advisory Notes

The proposed development site is crossed by public sewers with the approximate position being marked on the attached Statutory Public Sewer Record. The positions shall be accurately located, marked out on site before works commence and no operational development shall be carried out within a specified easement zone either side of the centreline of the public sewers. The applicant is advised to contact Welsh Water to discuss.

The applicant may need to apply to Dwr Cymru / Welsh Water for any connection to the public sewer under S106 of the Water Industry Act 1991. If the connection to the public sewer network is either via a lateral drain (i.e. a drain which extends beyond the connecting property boundary) or via a new sewer (i.e. serves more than one property), it is now a mandatory requirement to first enter into a Section 104 Adoption Agreement (Water Industry Act 1991). The design of the sewers and lateral drains must also conform to the Welsh Ministers Standards for Gravity Foul Sewers and Lateral Drains, and conform with the publication "Sewers for Adoption"- 7th Edition. Further information can be obtained via the Developer Services pages of www.dwrcymru.com

The applicant is also advised that some public sewers and lateral drains may not be recorded on our maps of public sewers because they were originally privately owned and were transferred into public ownership by nature of the Water Industry (Schemes for Adoption of Private Sewers) Regulations 2011. The presence of such assets may affect the proposal. In order to assist us in dealing with the proposal the applicant may contact Dwr Cymru Welsh Water to establish the location and status of the apparatus. Under the Water Industry Act 1991 Dwr Cymru Welsh Water has rights of access to its apparatus at all times.

Our response is based on the information provided by your application. Should the proposal alter during the course of the application process we kindly request that we are re-consulted and reserve the right to make new representation.

If you have any queries please contact the undersigned on 0800 917 2652 or via email at developer.services@dwrcymru.com

Please quote our reference number in all communications and correspondence.

Yours faithfully,

Rhodri Perry
