

Monocouche Renders

weberpral monocouche renders create an external, decorative, coloured finish suitable for most types of brick or blockwork.

The factory production process for **weberpral** renders ensures quality materials are used in a controlled and accurate method, using proven engineered formulations which result in high performance in practice.

Colour and Texture

A wide range of colours and textures are possible creating a wide range of options for the designer. Colour charts are shown on the following pages.

Fast Track Construction

The use of advanced technology enables the **weberpral** range to be applied in one application. In addition, it can be applied by machine, creating even faster application.

Low Maintenance

weberpral renders are coloured in nature and therefore do not require further decoration. Should the need arise, the render can be easily cleaned with a 'hobby' style pressure washer and suitable detergent.

Stonework design such as ashlar can be replicated by cutting recessed joints into the finished render using specialist tools.

Changes in colour or thickness can be employed to produce raised features such as bands, plinths and stones.

Alternatively, the render can be finished as a traditional roughcast spray finish which is particularly effective in areas of high exposure.
