For the attention of Matthew Phillips

Dear Matthew,

**BWRIAD / PROPOSAL: USE OF TEMPORARY CAR PARKING AREA ON A
PERMANENT BASIS AND CONSTRUCTION OF PREVIOUSLY
GRANTED OVERSPILL CAR PARK PROVIDING AN ADDITIONAL
194 CAR PARKING SPACES
HMP BERWYN BRIDGE ROAD WREXHAM INDUSTRIAL ESTATE WREXHAM**

LLEOLIAD / LOCATION: HMP Berwyn, Bridge Road, Wrexham Ind Estate

Thank you for consulting Natural Resources Wales (NRW) about the above, which was received on 18/10/2019.

We have significant concerns with the proposed development as submitted. We recommend that you should only grant planning permission if the scheme can meet the following requirements. We would object if the scheme does not meet these requirements.

Requirement 1 - We advise that a GCN survey and report are required that assess the extent of adverse effects on any GCN found to be present and any avoidance or mitigation measures required. This must demonstrate that the proposed development would not be likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range.

Protected Species

Our records show there are likely to be protected species in the vicinity of the site (records of Great Crested Newts (GCN) within 62 m of the site). We note that there is no information about protected species with the application. We advise that the applicant need to consider the presence of the GCN as a European protected species. Over 500 GCN were relocated from the original prison development site. We would recommend the developer Liaise with the Local Authorities internal ecological advisor to determine the scope of any survey required.

Other Matters

Our comments above only relate specifically to matters that are listed in our 'Consultation Topics' document (September 2018) which is published on our website: (<https://cdn.naturalresources.wales/media/686847/dpas-consultation-topics-august-2018-eng.pdf?mode=pad&rnd=131819256840000000>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Advice for the Developer:

Pollution Prevention

All works at the site must be carried out in accordance with PPG6: 'Working at construction and demolition sites' which is available on the following website: <http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Waste produced during construction

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provide information on how to classify waste and register as a waste carrier or hazardous waste producer:

<https://naturalresources.wales/permits-and-permissions/waste/?lang=en>

<https://naturalresources.wales/permits-and-permissions/waste/waste-permits/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

Surface Water Drainage

If a car park is for more than 50 vehicles, then a fuel interceptor must be installed on the drainage from the car park – unless a Sustainable Urban Drainage System (SUDS) is implemented. PPG3 provides further guidance and is available on the following website:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Where SUDS is proposed for surface run-off from e.g. car parking, the applicant should be advised to refer to the Environment Agency's Position Statement G13 on groundwater protection available on the following link:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/692989/Environment-Agency-approach-to-groundwater-protection.pdf

Yn gywir / Yours faithfully,

Daniel Davies
