Mared

I don't think that the actual siting of the new replacement garage will cause any problems for public footpath Allington 18 (shown as a black dashed line on the attached map). However, I am assuming that the applicants will need to use the track where the public footpath is to access the site during construction and I am concerned that running vehicles along the public footpath may damage its surface. If the surface of the public footpath is damaged during construction by the applicant and/or any contractors they have working on site then this damage will need to be repaired after construction to the satisfaction of the council.

Regards

Nicola Holmwood
