

Dear Sir/ Madam,

It is with great sadness that I find myself writing another objection letter against a planning application from Kronospan , which has already been refused for once by Wrexham County Borough Council (a very rare occurrence) and is again being appealed to a higher authority. They never give up do they, nor have any consideration for the residents of Chirk and money gets them everything they want, you can take that how you like.

I live less than 100yds. from a production line that runs through the night, every night, I am 64 yrs. old and work until 22.50pm. every other week, 37hrs. I am very often still awake into the small hours and if hot at night, as it has been lately, we cannot have our windows open because of the noise and as happened two nights ago a strong smell of something and dust clouds. We are the only people in the country who pray for rain in the Summer to keep the dust down, now that's not right is it?

This factory has been allowed to expand and expand until it has an impact on everyone's lives in one way or another and there has to come a time to call a halt to this expansion, and maybe we can sometime in the future have some sort of normality without all this noise and dust and hundreds of wagons passing through everyday, so much for environmental issues, high on the political agenda at the moment.

I am appealing to you to help us, our lives are blighted by this company and nobody gives a damn, but hopefully one day someone will be held accountable for the wrong decisions they made in the past. What a waste of time and taxpayers money this all costs, it's a disgrace.

On a final note, I have heard that the production line has already been built, no surprises there then, and if this application was to build a new road to take traffic out of our town, I would welcome it with open arms, wishful thinking, lol 😊.

Yours with anticipation,

Linda Heyward.
