Sharon,

Further to your recent email, I can confirm that the surrounding vegetation is low level Hawthorn scrub that is entirely unaffected by the development proposal and no works pruning works are required/proposed. The garage is pre-fabricated and will be craned onto the existing slab and as such there is no construction work anywhere near the scrub so there is no need to erect tree protective fencing.

I have spoken to Alistair Henderson from Tree Solutions and he has confirmed this to me.

I have also updated the attached site plan.

I would be grateful if you could now please confirm that you are able to progress with the application?

Regards

Carl Hughes
