Hi Philip,

For your information, with regards to the treatment plant, it is proposed to upgrade the existing system however to date we have no specific details of that upgrade.

It is assumed that building regulations approval will be required when the upgrade is undertaken along with a discharge permit from NRW. Again this is presumed to be needed before we do any works to the existing treatment system.

Contact has been initiated by the applicants with NRW on an upgrade and contact is ongoing. It is not considered, given the requirements of other environmental and building regulation legislation, that a future upgrade of the treatment system has any bearing on the current application.

Regards

Peter Miller
