To whom it may concern,

Mr Davies of Llwyn Howell has asked me to write regarding the caravan he keeps at his livestock buildings at The Park. The buildings house calving heifers and lambing ewes at various periods throughout the year. During lambing and calving periods stock need to be checked regularly in order to identify and assist with any parturition difficulties. Therefore as his vet I feel it would be in the best interests of his livestock if someone were able to stay on site during these critical periods to ensure that the welfare of these animals is not compromised.

Yours sincerely,

Dr Claire Woolley BVMedSci BVM BVS MRCVS
