Sharon

I've checked our records regarding this and note that the application is to increase the size of the extension. It appears to me that the main property itself hasn't yet been constructed therefore I would expect that the gas protection measures would be installed for the whole of the property foundations, the extension included. Provided this would be the case then I have no further comments.

Regards Angela

Angela,

Re: P/2019/0621

Please can you look at the above planning application, there is a previous condition that you have been involved with, I don't have time to look before I go on leave. Please can you liaise directly with Sharon, I have copied her in so that she is aware that you are going to look at it.

Thanks
Stacey
