P/2019/0283 – Discharge of Condition 6 (Gas protection measures only)

I have reviewed the following report which has been submitted to partly discharge condition 6 and can confirm that the report is satisfactory in regard to verification of the gas protection measures. As noted in the report creation of a cover system with imported soils is yet to be undertaken, therefore until a verification report detailing this work has been submitted and approved I would not recommend that Condition 6 is discharged.
