

**Kronospan Site Boundary**

**Proposed Raw Board Store**

**Zone of Theoretical Visibility (Proposed Raw Board Store)**

**D LVIA Viewpoint Location**

**8 Supplementary Viewpoint Location**

**Areas 'blocked out' of the ZTV (buildings and significant tree cover)**

NOTES:

1. Zone of Theoretical Visibility has been generated using GetMapping Aerial Photography derived 2m Digital Surface Model (DSM), which takes account of the presence of buildings and vegetation. The Root Mean Square Error of the DSM (the accuracy of height data) is + or - 50cm. The date of the aerial photography is 2009. Taller/ larger structures at the Kronospan site have been added manually to the DSM.
2. Curvature of the earth has been allowed for
3. The eye height of the viewer was set at 2m.
4. Visibility of Raw Board Store has been modelled at height 11.435m above existing roof level.
