Further to my Memo dated 18 December 2018, two photographs have now been submitted in addition to the lab results already submitted. However there is still insufficient detail to recommend discharge of the condition. There is no explanation of what the photos are showing, what the lab results are for and as outlined in the Memo of the 18th it remains unclear that the agreed remediation works have been fully completed.

Should you have any queries regarding this Memo please do not hesitate to contact me.
