Subject: 82 beechley road hightown

evening Jon

further our discussion over the phone in regards Jennis beech tree at 82 beechley road in regards to the proposed works that Jennis has planned "a extended driveway" there is no need for concern for the welfare of the large beech trees root system but for reference of the construction contractors, a perimeter/fence will be installed so damage will not be possible the the RPA

in accordance to BS5837 the trunk or base of tree is 1meter so a 17meter RPA/RPZ will be established due to the perimeter not being consistant in circumfrance ie a wall and a fence/ border surrounding 2/5 of the tree

if you have any concerns over proposed works or welfare of the beech tree in question at 82 beechley road then please give me a call or email

many thanks

mike sadowski
