

Dear Madam/Sir

The application to extend permission to allow night and public holiday haulage to and from Talwrn Farm must not be granted for the following reasons:

1. The will of the local neighbourhood and council is firmly against this
2. The applicant is 'gaming' the system. The news article shows that after the application for the first barn, Ian Pick said there would be no chicken city. After the first permission was granted they had laid the foundation for two barns. They then subsequently applied and got a second barn. For both of these barns they agreed to the requirement of no night or public holiday traffic. They have repeatedly broken this condition (evidenced with Enforcement) and now they apply for permission.
3. During one of the night time we transits, various recordings were made. These show the horrific sounds being produced by the chickens during this process. The flashing lights, the loud noises must have been terrifying for the chickens and this is reflected in the awful screeching they made.
4. The repeated and continued breaches of conditions (HGVs using non-permitted routes, noise, night-time flashing lights, night time transportation, odour) all reported to Enforcement cannot be rewarded with yet more permissions.
5. The Inspector Kay Sheffield required no night time or weekend traffic. This decision should be respected, upheld and enforced.

Should you have any questions then I would be delighted to discuss further.

Best wishes,

Rhys Davies
