

For the attention of Philip Forster

15/01/2019

Dear Philip,

TOWN AND COUNTRY PLANNING ACT 1990
DEDDF CYNLLUNIO GWLAD A THREF 1990

**PROPOSAL:
EXTENSIONS TO DWELLING
LOCATION:
Cambrian Cottage, Bettisfield**

Thank you for re-consulting Natural Resources Wales (NRW) about the above, which was received on 12/12/2018 with a copy of the Record of Assessment of Likely Significant Effect on A European Site (12/12/18) relating to the proposed development.

NRW would not object to these proposals as we consider they are unlikely to have a significant adverse effect upon the interests listed.

Protected Sites

From the information provided, we consider that the proposal is not likely to have a significant effect on a SAC, SPA or Ramsar.

Since the proposal is outside the protected site and Wrexham CBC TLSE makes no reference to loss of SAC area, and confirmation has been given that a condition will be placed on any permission to ensure that site run-off and mixing or storage of materials such as concrete will be carried out away from any watercourses or sensitive habitats, we agree with the conclusion that there would be no likely significant effect.

Our advice may change should modifications be made to the proposed development prior to the determination of the application. If there are any changes to the proposed development which may affect the consideration of potential environmental impacts, please consult us again before you determine the application.

Please do not hesitate to contact us if you require further information or clarification of any of the above.

Our comments above only relate specifically to matters that are listed in our 'Consultation Topics' document (September 2018) which is published on our website: (<https://cdn.naturalresources.wales/media/686847/dpas-consultation-topics-august-2018-eng.pdf?mode=pad&rnd=131819256840000000>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

Advice to Applicant

Pollution Prevention

Due to the proximity of the site to watercourses, all works at the site must be carried out in accordance with GPP5 and PPG6: 'Works in, near or over watercourses' and 'Working at construction and demolition sites' which are available on the following website: <http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-qpps-full-list/>

Foul Drainage

With respect to the discharge of effluent to ground or surface water, the Applicant will need to apply for an environmental permit or register an exemption with us. The Applicant must obtain any necessary permit or exemption prior to commencement of work on site. Septic tanks and small sewage treatment works may be registered as exempt from the requirement to obtain an environmental permit if certain criteria is met. Please note, should a permit be required, further information may be required as part of that application and the Applicant is therefore advised to hold preapplication discussions with our Permitting Team on 0300 065 3000, at the earliest opportunity, to try to ensure that there is no conflict between any planning permission granted and the permit requirements. More information, including a step by step guide to registering and the relevant application forms are available on our website. Where private sewage treatment/disposal facilities are utilised, they must be installed and maintained in accordance with British Standards 6297 and Approved Document H of the Building Regulations. We also refer the Applicant to Pollution Prevention Guideline 4 which provides further information.

Waste

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered

- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provided information on how to classify waste and register as a waste carrier or hazardous waste producer:

<http://naturalresources.wales/waste/how-to-classify-and-assess-waste/?lang=en>

<http://naturalresources.wales/apply-for-a-permit/waste/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Yn gywir / Yours sincerely,

Daniel Davies

Daniel Davies

Cynghorydd Cynllunio Datblygu / Development Planning Advisor
