A0

This survey has been prepared at the client's own instruction solely for the purpose of assessing the trees with respect to current relevant standards. Any liability shall be for whichever party is liable under such provisions under the English law. This survey is not to be relied upon in any context other than that described above.

It is the responsibility of the client to ensure that copies of this survey are supplied, in its entirety, to any professional team members employed in connection with the project and that they are aware of the survey's limitations. No liability is accepted for any use of this report or its contents for any purpose other than that for which it was prepared and provided to the client. No liability is accepted for any use of this report or its contents when applied to any other land.

Any persons using the information in ACS Consulting, and any documentation, between the survey and any other landscape, should be licensed to do so accordingly.

Arboricultural Legend

(some applicable)

- Tree(s) of high quality and value (A)
- Tree(s) of moderate quality and value (B)
- Tree(s) of low quality and value (C)
- Loss to condition

Construction Exclusion Zone — CEZ

Root Protection Area — RPA

Tree Retained

Hedge Retained

Group Retained

Photo Position (& orientation)

General Notes

1. Tree canopies have been measured and plotted at their cardinal points for clarity and presentation purposes.
2. The location and attributes of off-site trees have been approximated unless otherwise stated.
3. The Root Protection Area (RPA) is a layout design tool indicating the minimum area around a tree deemed to contain sufficient roots and rooting volume to maintain the tree's viability and where protection of the roots and soil structure is to be treated as a priority. (Refer to main report for further details).
4. Site traffic or obstructions encountered at the time of the survey may have resulted in arborose features being omitted or their attributes being approximated.
5. Tree works are to be undertaken by qualified contractors to BS3998:2010.
6. Trees are to be Ree Assessed for nesting birds and bats.
7. The arboricultural survey is based on the original topographical survey. The location of features shown has not been checked.
