

Existing manure storage capacity

Honkley farm
East View Farm,
Cobblers Lane,
Burton
Rossett
LL12 0AL

CPH number: 56/010/0022

Single Business
Identifier (SBI):

Annual rainfall (mm) : 703

It is important to know the capacity of the manure stores on the holding and whether there is sufficient capacity to meet the requirements of the NVZ rules. The PLANET module 'Organic Manures Inventory' can be used to calculate the quantity and nutrient content of organic manures on the holding and to estimate the NVZ minimum manure storage requirement. See the relevant NVZ Guidance leaflet for further information.

	Liquid capacity (volume) m ³	Solid capacity (volume) m ³	Capacity (fresh weight) t	Surface area m ²
Slurry stores				
Concrete store	6,793			1,836
Slurry sub total	6,793			1,836
Dirty water stores				
Dirty water sub total	0			0
Solid manure stores on a concrete base or in poultry houses				
Solid manure sub total		0	0	0
TOTAL	6,793	0	0	1,836

The values for the capacity of each store are based on the information entered. For earth-banked stores, the values shown allow for a freeboard of 0.75 metres (750 mm). For all other stores, the values shown allow for a freeboard of 0.3 metres (300 mm).
