Dear Alaw and Philip.

Please find attached drawing indicating that SJ29537803 has been located and is not on my plot nor will it be within 3mtrs of my proposed build.

Also, I can confirm that the aforementioned manhole will be the point of entry for the foul water removal from my proposed dwelling.

In addition, please note it is my intention that any rainwater collected from my roof will be stored on site in a rainwater collection system and will not be discharged directly into the surface water drainage system.

Please amend your records accordingly.

Sorry, I had trouble attaching the image so I sent it on a separate email.

Regards

Peter Robbins
