Subject: P/2018/0724 appeal at Talwrn farm Legacy Wrexham

Afternoon. This application came to Wrexham's planning committee recently. The inspector at the original application rightly conditioned the times of traffic movement etc because of the proximity to numerous houses near to the farm. This in principal was taken after much thought and deliberation by the planning inspector, theoretically it makes the best of a bad job. The applicants have continuously flouted this condition and I have had numerous complaints, the last one two weeks ago was about horrific noise etc at 4.15 am where lorries were loading and unloading which caused much stress and infringement of health and well being to the residents. I feel the original condition was attached to enable residents to have a decent quality of life. I have looked at this recent application to remove conditions, if it was right to condition then what has changed now? the answer is nothing. To persuade anyone of allowing the application to give 24/7 permission is to basically allow them to do what they like and make life unbearable for their neighbours and have a serious impact on their quality of life. I strongly oppose this application. regards. cllr Paul H Pemberton WVBC (Ponciau Ward)
