

FAO Philip Forster

05/03/2019

Dear Philip,

TOWN AND COUNTRY PLANNING ACT 1990
DEDDF CYNLLUNIO GWLAD A THREF 1990

BWRIAD / PROPOSAL:
**CONSTRUCTION OF NEW VEHICULAR ACCESS TO INCLUDE DROPPED KERB AND
1 NO. 3 METRE STEEL GATE**
LLEOLIAD / LOCATION:
Land North East of Pen Y Nant, Church Road, Minera, Wrexham

Thank you for consulting Natural Resources Wales (NRW) about the above, which was received on 14/02/2019.

NRW has no objection to the proposal. However, we would provide the following advice:

Protected Species

We note that the ecology report submitted in support of the above application (reference Minera CSO: Ecological Appraisal Report, ARUP, 2017). The Ecological Appraisal has considered the presence of protected species at the application site. We concur with the assessment and conclusions in respect of protected species.

Pollution Prevention

Due to the proximity of the site to watercourses, all works at the site must be carried out in accordance with GPP5 and PPG6: 'Works in, near or over watercourses' and 'Working at construction and demolition sites' which are available on the following website: <http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

During the construction phase you should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages. For further guidance please refer to GPP 5 and PPG 6 at the following link:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Waste

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provided information on how to classify waste and register as a waste carrier or hazardous waste producer:

<http://naturalresources.wales/waste/how-to-classify-and-assess-waste/?lang=en>

<http://naturalresources.wales/apply-for-a-permit/waste/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

Please do not hesitate to contact us if you require further information or clarification on any of the above.

Our comments above only relate specifically to matters that are listed in our 'Consultation Topics' document (September 2018) which is published on our website: (<https://cdn.naturalresources.wales/media/686847/dpas-consultation-topics-august-2018-eng.pdf?mode=pad&rnd=131819256840000000>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Yn gywir / Yours sincerely,

Daniel Davies

Daniel Davies
