

21/02/2019

Er sylw / For the attention of Philip Forster

Dear Mr Forster,

BWRIAD / PROPOSAL: OUTLINE APPLICATION FOR RESIDENTIAL DEVELOPMENT (8 NO. DWELLINGS) AND CONSTRUCTION OF NEW ACCESS, CLOSURE OF EXISTING ACCESS TO GARDEN CENTRE AND CONSTRUCTION OF NEW ACCESS POINT

LLEOLIAD / LOCATION: FERNDAL GARDEN CENTRE, BERSE ROAD, CAEGO, WREXHAM - P/2019/0089

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which was received on 11/02/2019.

We recommend that you should only grant planning permission if you attach the following conditions. These conditions would address significant concerns that we have identified and we would not object provided you attach them to the planning permission.

Condition 1 - Protected Species: Planning permission should include conditions necessary to secure all avoidance and mitigation measures described in the bat report being set out in a method statement.

Condition 2 - Protected Species: The submission and implementation of an external lighting/ internal light spillage scheme.

Protected Species

Bats:

We note that the bat report submitted in support of the above application (The Tyrer Partnership. Preliminary Ecological Appraisal & Dusk Emergence Bat Surveys:

Ferndale Garden Centre.2017) has identified that the common pipistrelle and the brown long eared bat are present at the application site. From the information submitted, we consider that the proposed development represents a higher risk for bats, as defined in our guidance document '*Natural Resources Wales Approach to Bats and Planning* (2015)'. Bats and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017.

We advise that the proposed development is likely to harm or disturb the bats or their breeding sites and resting places at this site. Therefore, we advise that the below conditions should be attached to any planning permission for this scheme to ensure appropriate avoidance and mitigation measures. Provided those measures are implemented, we do not consider that the proposed development is likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range.

Condition 1 - Protected Species: Planning permission should include conditions necessary to secure all avoidance and mitigation measures described in the bat report being set out in a method statement.

Condition 2 - Protected Species: The submission and implementation of an external lighting/ internal light spillage scheme.

NRW would refer the Local Authority to the Chief Planning Officer's letter dated 01 March 2018 which advises Local Planning Authorities to attach an informative regarding licence requirements to all consents and notices where European Protected Species are likely to be present on site.

Great Crested Newts (GCN):

Great crested newts are covered by the same legislation as bats and the accompanying ecological assessment (The Tyrer Partnership (2017), also considered GCN presence. The report confirms that there is no suitable GCN habitat at the site. We can confirm that we consider the assessment in respect of great crested newt to be satisfactory.

Ecological Compliance Audit

We advise that any future consent includes the imposition of a condition that requires the submission and implementation of an approved ecological compliance audit (ECA) scheme to the satisfaction of the LPA.

The purpose of the Ecological Compliance Audit is to evidence compliant implementation of all ecological avoidance, mitigation and compensation works, either proposed or subject to the provisions of reserved matters conditions. The Audit shall identify Key Performance Indicators (KPI's) that are to be used for the purposes of assessing and evidencing compliant implementation of proposals.

Biosecurity

We consider biosecurity to be a material consideration owing to the nature and location of the proposal. In this case, biosecurity issues concern invasive non-native species (INNS) and diseases.

We therefore advise that any consent includes the imposition of a condition requiring the submission and implementation of a Biosecurity Risk Assessment to the satisfaction of the LPA.

We consider that this assessment must include:

- (i) appropriate measures to control any INNS on site; and
- (ii) measures or actions that aim to prevent INNS

being introduced to the site for the duration of construction and operational phases of the scheme.

Please do not hesitate to contact us if you require further information or clarification of any of the above.

Our comments above only relate specifically to matters that are listed in our 'Consultation Topics' document (September 2018) which is published on our website: (<https://cdn.naturalresources.wales/media/686847/dpas-consultation-topics-august-2018-eng.pdf?mode=pad&rnd=131819256840000000>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

Advice for the Developer

Historic Landfill:

According to our records the proposed development site is located near to land that is, or has been, used for the deposition of waste material. We would therefore advise you to consult with the local authority's Environmental Health and Building Control Departments, as they may hold detailed records, and may wish to make appropriate recommendations in respect of landfill gas investigation/remedial work. The developers should be made aware of the existence of the landfill site(s) so that they can decide whether or not to make their own investigations into the presence of landfill gas. It should also be noted that Waste Management Paper 27 states "It has been found that many sites which have taken only supposedly 'inert' waste have produced gas".

Environmental Management:

During the construction phase you should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages.

All works at the site must be carried out in accordance with PPG6: 'Working at construction and demolition sites' which are available on the following website:
<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

The activity of importing waste into the site for use as, for example hardcore, must be registered with Natural Resources Wales as an exempt/permittable activity under the Environmental Permitting Regulations 2016. The developer should contact Natural Resources Wales to discuss the necessity for an exemption/permit for any material imported to and exported from the site.

If during construction/excavation works any contaminated material is revealed, then the movement of such material either on or off site should be done in consultation with Natural Resources Wales. Any waste excavation material or building waste generated in the course of the development must be disposed of satisfactorily and in accordance with Section 34 of the Environmental Protection Act 1990. Carriers transporting waste from the site must be registered waste carriers and movement of any Hazardous Waste from the site must be accompanied by Hazardous waste consignment notes.

Foul Drainage:

There is no information on foul drainage with the submission and, according to our records, the development site is outside main sewer catchment area range. We have no objection in principle to the proposals, however, we consider that the applicant should be made aware of the following:

With respect to the discharge of effluent to ground or surface water, the applicant will need to apply for an environmental permit or register an exemption with us. The applicant must obtain any necessary permit or exemption prior to commencement of work on site. Septic tanks and small sewage treatment works may be registered as exempt from the requirement to obtain an environmental permit if certain criteria are met. Please note, should a permit be required, further information may be required as part of that application and the applicant is therefore advised to hold pre-application discussions with our Permitting Team on 0300 065 3000, at the earliest opportunity, to try to ensure that there is no conflict between any planning permission granted and the permit requirements.

More information, including a step by step guide to registering and the relevant application forms are available on our [website](#). Where private sewage treatment/disposal facilities are utilised, they must be installed and maintained in accordance with British Standards 6297 and Approved Document H of the Building Regulations. We also refer the applicant to [Pollution Prevention Guideline 4](#) which provides further information.

Construction Waste:

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste

- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provide information on how to classify waste and register as a waste carrier or hazardous waste producer:

<https://naturalresources.wales/permits-and-permissions/waste/?lang=en>

<https://naturalresources.wales/permits-and-permissions/waste/waste-permits/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Yours faithfully,

Joy Evans

Ms Joy Evans
