To whom it may concern

I confirm that we are willing and able to receive up to 1000 tonnes of poultry manure per year from D.J. Huxley farms Ltd.'s poultry unit at Mulsford.

We need the manure to use as feed stock for our anaerobic digester to produce electricity as a renewable energy source.

We are able to receive and store the manure immediately at shed clearout.

Our Enviromental permit is EPR/AB3393FL

Yours sincerely

Richard Tomlinson
