Er sylw/ For the attention of:
Kevin Hughes

04/ 10/ 2017

Dear Mr Hughes,

**HILL VIEW, CHAPEL LANE, BRONINGTON - P/2017/0800
OUTLINE APPLICATION TO ERECT SINGLE DWELLING**

Thank you for consulting Natural Resources Wales regarding the above proposal, received on 26/ 09/ 2017.

Natural Resources Wales has no objection to the scheme.

Protected Species

The proposed development site has a number of trees. We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Foul Drainage

Government policy states that, where practicable, foul drainage should be discharged to the mains sewer. Where this is not possible and private sewage treatment / disposal facilities are utilised, they must be installed and maintained in accordance with British Standard 6297 and Approved Document H of the Building Regulations 2000. You should also have regard to Welsh Office Circular 10/99 in respect of planning requirements for non mains sewerage.

The applicant will need to apply for a Permit or Exemption, if they wish to discharge anything apart from uncontaminated surface water to a watercourse/ditch. They may also need to apply for a Permit from our National Permitting Team to allow certain discharges into ground. They must obtain any necessary Permit prior to works starting on site.

The Welsh Government has also advised that all septic tanks and small sewage treatment plant discharges in Wales will need to be registered. More information, including a step by step guide to registering, is available on our website www.naturalresourceswales.gov.uk / www.cyfoethnaturiolcymru.gov.uk

Environmental Management

The importation of waste to the site for use in construction (e.g. to make the bases of the pods, or car park) needs to be registered as an exempt activity under the Environmental Permitting Regulations 2016, or a permit sought. The following link will take the applicant to the relevant NRW webpage for registering such an exemption, or applying for a waste permit: <https://naturalresources.wales/apply-for-a-permit/waste/?lang=en>

Any waste excavation material or building waste generated in the course of the development must be disposed of satisfactorily in accordance with duty of care requirements under section 34 of the Environmental Protection Act 1990. The waste shall be transported using registered waste carriers to suitably permitted or exempt sites. Transfer notes shall be kept for each load for a minimum of 2 years. Please do not hesitate to contact us if we can be of any further assistance to you or if you wish clarification on the above.

Our comments only relate specifically to matters that are included on our checklist “Natural Resources Wales and Planning Consultations” (March 2015) which is published on our website: (<https://naturalresources.wales/media/5271/150302-natural-resources-wales-and-planning-consultations-final-eng.pdf>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance. Any site owner/developer should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Yours sincerely,

Joy Evans
