Er sylw / For the attention of: Kevin Hughes,

Annwyl / Dear Mr Hughes,

TOWN AND COUNTRY PLANNING ACT 1990
DEDDF CYNLLUNIO GWLAD A THREF 1990

**BWRIAD / PROPOSAL: ERECTION OF STABLE BLOCK
LLEOLIAD / LOCATION: PADDOCK OPPOSITE KILN COTTAGE, BROOKHOUSE
LANE, AROWRY, HANMER, WREXHAM, SY13 3EQ**

Thank you for consulting Natural Resources Wales (NRW) on the application above, which was received on the 17th of October 2017.

NRW does not object to the proposal. In our opinion the proposal is not likely to adversely affect any of the interests listed. We have the following advice for your information.

European Protected Species(EPS)

We note that there is no information about protected species with the application. We therefore assume that the Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present and affected by the development.

Horse manure

To comply with the relevant legislation please follow the guidance on horse manure and other types of waste, which is provided here: <https://www.gov.uk/guidance/keeping-horses-on-farms#horse-manure-and-other-types-of-waste>. For further advice please contact NRW's Customer Contact Centre on 0300 065 3000 (Mon-Fri, 9am-5pm).

Construction Waste

The activity of importing waste into the site for use as, for example hardcore, must be registered with Natural Resources Wales as an exempt/permittable activity under Environmental Permitting Regulations 2010. The developer should contact Natural Resources Wales to discuss the necessity for an exemption/permit for any material imported to and exported from the site. For further information please visit the website <https://www.gov.uk/government/collections/waste-exemptions-using-waste> and contact our Customer Centre on 0300 065 3000 (Mon-Fri, 9am-5pm).

If during construction/excavation works any contaminated material is revealed, then the movement of such material either on or off site should be done in consultation with Natural Resources Wales. Any waste excavation material or building waste generated in the course of the development must be disposed of satisfactorily and in accordance with Section 34 of the Environmental Protection Act 1990. Carriers transporting waste from the site must be registered waste carriers and movement of any Hazardous Waste from the site must be accompanied by Hazardous waste consignment notes. These notes must be kept for at least two years.

Pollution Prevention

During the demolition of the existing building and the construction phase of the new stable blocks, the developer should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages. For further guidance please check "Working at construction and Demolition Sites, Pollution Prevention Guidance 6": <http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Please do not hesitate to contact us if we can be of any further assistance to you or if you wish clarification on the above.

Our comments above only relate specifically to matters that are included on our checklist "Natural Resources Wales and Planning Consultations" (March 2015) which is published on our website: (<https://naturalresources.wales/planning-and-development/planning-and-development/?lang=en>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance. The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Yn gywir / Yours sincerely,

Holly Tomlinson

Cynghorydd Cynllunio Datblygu / Development Planning Advisor
