

33 Fennant Road

Ponciau

Wrexham

LL14 1HL

Councillor Pemberton

Regarding the proposed traveler site on Fennant Road, I would like to bring to your attention the very dangerous state of the road, as you are aware there are no pavements, we did have a letter box which was situated in our wall which is on the road, but the Post Office had so many reports from staff who emptied the box of the risks that they were put under while carrying out their work that the box was closed and was lost to the community and never replaced, this is due to the traffic not following the speed limits, and giving no consideration for others on the road.

There was an incident when the postman was knocked down and injured when he left our property, the car never stopped, the postman was taken to hospital he was badly bruised and off work with shock also a local lady walking down Fennant Road

had to jump onto the bank which is opposite to the proposed site entrance or she would have been knocked over, again the car drove off. My husband was clipped by the wing mirror of a car as he was standing on the road, once again the car carried on all of these incidents happened in broad daylight.

Fennant Road is just so dangerous the position of the access application is on a blind dip in the road and on a bend, and the road is at one of its narrowest points with no central road markings, there have been many traffic incidents in that area of which the police are aware and some that did not get reported.

I have lived in the area for forty years and it must luck or the hand of God that no one has been killed.

I know and trust that you will do your very best for the village that you are the elected councillor for
