

Dear Sir/ Madame

I am writing to you in order to express my concerns for the planning application listed below.

Planning reference P2016 0533 Erection of two Broiler Chicken rearing buildings

Welsh Government ref/Planning inspectorate ref: H 6955/A/17/3167412.

The proposal sites the installation of two Broiler Chicken rearing buildings within two hundred meters of my home. I am therefore very concerned that the siting of these buildings will have a devastating impact on my health and wellbeing. I am particularly worried by the potential for avian based deceases effecting myself and others who reside within the Cross Lanes area. I am also concerned by the level of noise pollution generated by the enterprise and the 40000 chickens housed there. My property is adjacent to Bedwell road and close to the boundary of the proposed site. I am therefore concerned that the facility will negatively impact the air quality within the area both in terms of the aroma and level of airborne particulates generated by the operation thus depriving me of the use and enjoyment of my garden during my retirement.

I am also worried that the building and feeding arrangements for the proposed facility will attract an increased level of vermin in the area along with their associated problems. I would also suggest that the siting of these facilities would restrict any future residential development or improvement in amenities for the Cross Lanes area.

I would therefore like to register my objection for this proposal.

Regards

Mr E Edgerton
