Welsh Gov Ref/Planning Inspectorate Ref H6955/A/16/3165368

Dear Sirs

We live in No 13 West View, Chirk, on the main road directly opposite the Kronospan factory. We have lived in this property since 1977.

During our time living in this property we have seen this factory mushroom and extend to such an extent that it more or less dwarfs Chirk. What worries us is the creeping development which never seems to end.

In this matter especially the worry is a new melamine facing press. Would I be right in asking how much traffic increase will see. The amount of traffic and huge lorries going in and out of this factory is non stop (inwards and outwards). We can watch lorries going past our house every few seconds. Very often the lorries are stacking up outside the factory gates because it is so busy they cannot get in.

So here the worry is also increased pollution from the lorries, dust and diesel fumes.

My next big concern is the siting of a petrol station and diesel storage tanks in the middle of a wood chip factory. I would sincerely hope that an oil spillage did not occur and a fire broke out as the consequences would be unimaginable.

Also once again with a petrol station and diesel storage tanks comes increased traffic flow. When will this all end?

Please do not say this is all in aid of local jobs because I think you will find it is not the case. There are different nationalities working here and the question also needs to be asked how the jobs situation stands and will there be automation used.

So to sum up my objections are creeping development, increased traffic flow and more pollution.

Mrs Susan Green
