2500HQi

Buy Online

[Product summary](#)[Product Spec](#)[Download](#)

Harlequin oil tanks are an investment in the future of your heating system and of your property. All Harlequin oil tanks feature integral bunding as standard. This means that each tank features a tank within a tank design and can therefore protect your valuable heating oil if the inner tank happens to split. Single skin tanks cannot provide this reassurance and the consequences can be costly and hugely damaging to the environment.

Harlequin HQi bunded oil tanks have been designed for customers who do not require the additional technological benefits as featured on all Harlequin 'iTank' oil storage tanks.

HQi bunded oil tanks offer a 'no nonsense' oil storage solution and are available in 11 different tank capacities, ranging from 350 litres, to 3,500 litres.

The 2500HQi is supplied with the following features:

- 33mm drilled and plugged gauge hole

- 2" fill point

- 4" lockable inspection point

- lockable manhole access

- 1" BSP (F) outlet connection

- Vent

- Contents dipstick (Not available on 350 litre models or models over 3500 litres)
