Phil

This site has gone on for ages and I've checked back and it seems to have been Janet Sutherberry that we liaised with initially, I'm not sure if you can help with it now please?

We've finally received the validation report, sorry it arrived a month ago now but I accidentally overlooked this email. I can confirm that the attached validation letter report prepared by Smith Grant dated 15th Feb 17 is sufficient and would recommend that the condition can now be discharged.

It is noted that the waste codes on the transfer notes in Appendix B are not consistent and possibly the one that does have a code for soil may not be the correct one either 17 05 04 due to the lead contamination. As this is a waste regulation matter NRW may wish to pursue this issue further so I will forward this to them for consideration.

Regards Angela

Angela,

Please find attached a copy of our verification report detailing the validation of the placed garden cover system.

Kind Regards
