

Dear Sirs/Madam

It has been brought to my attention that the above planning application has been referred to yourselves.

As a resident who lives in Chirk, facing Holyhead Road, I would like to support the decision by WCBC to refuse planning. We moved to Chirk over 12 years ago and knew that the Kronospan site would be a dominant feature of the village and we do support manufacturing and the impact to the local economy that Kronospan brings.

However, there are several fundamental issues with the site that still remain and my concern is that extending the site and introducing large scale construction could exasperate these issues, as below:

- HGVs constantly drive past our house night and day - a debate for another time perhaps but I wonder why a more direct access road to the site that doesn't bring HGVs through the village has been considered?
- There is no point cleaning your car as it will be covered in dust, from the site, overnight
- Sleeping at night with windows open is difficult due to above HGV activity and the constant noise from the site - whilst not overly noticeable during the day, it is really noisy at night.
- The proposal has been declined on appearance and this is a beautiful area with rather a blot on the landscape in Kronospan so I would welcome any movement to disguise the ugliness of the site.

Many thanks for your consideration...

Kind regards

Mrs Lockyer
