Walking down fennant rd. to my home (holmleigh fennant rd. IL141pg) arround 6 pm and walking facing oncoming traffic a car travelling at what I estimated at excessive speed rounded the bend in front of me and knocked my umbrella out of my hand, at this point in the road there was nowhere for me to safely go, as there is no pavement and this particular section of the road there is no grass verge (as there is in certain parts of fennant rd. This incident took place about March of this year(2016) Over the years of living on this road have had many narrow misses, and even a confrontation with a taxi driver who had to stop so as to avoid hitting me there was a vehicle travelling in the opposite direction and on passing me hurled abuse at me for what I think was delaying him and causing him to stop.
