Thank you for consulting Natural Resources Wales regarding the above proposal. NRW have the following comments:

Bats and their roosts are protected under the Conservation of Habitats and Species Regulations 2010 (as amended) and the Wildlife and Countryside Act 1981 (as amended). We advise that you should consult your internal ecologist with regards to the potential impact of the proposed development on the favourable conservation status of populations of bats.

Should your ecologist advise that further information is required in order to assess the likely impact of the development on bat species, NRW would wish to be re-consulted on the protected species assessments supporting the planning application.

Our comments above only relate specifically to matters that are included on our checklist "Natural Resources Wales and Planning Consultations" (March 2015) which is published on our website: (<https://naturalresources.wales/planning-and-development/planning-and-development/?lang=en>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Please do not hesitate to contact me if you require any further information or clarification.

Kind Regards,

Sara Price Jones
