Subject: Visitor Parking, Llay - Planning Application P/2015/0583 New Police Station

Dear Matthew,

We have undertaken some analysis of the detainee figures, solicitor attendance and other visitors to Wrexham and St Asaph custody suites.

The maximum likely number of visitors to Custody at any one time, arriving in separate vehicles, is **6 No.** people.

It is also felt that there could be a maximum of 4 No. interview rooms being used at any one time in the adjoining building, each we have assumed, would travel by car (1 No. car per interview room used), totalling **4 No.** vehicles at any one time

Within the building there are meeting facilities, which may involve members of the public visiting the premises, which would loosely map for the current visitor numbers to the station.

I have attached an extract from the station visitor log from 6th August until 11:30am Friday 6th November – during this 3 month snap shot, the peak visitor number was 13 at any one time (my Llay Project Team meeting accounted for 8 of those). Assume worst case of **13 No.** visitors, all arriving in separate vehicles being in the building at any one time.

From the above, the worst case requirement, based on present visitor and detainee information, for visitor parking would be 23 No. parking bays.

If you require any further information regarding the above, please do not hesitate to contact me.

Cheers,

Liz
