Subject: RE: Plas Power - Home Farm

Hello Matthew

No, I've nothing further to add.

I know the noise consultants have said that they are prepared to use the results of my snapshot 5-minute measurement – but it could also be argued that this is not representative either – although it is likely to represent a worst case scenario.

Regards Nick

Nick,

Do you have any further comments I can feed back?

Regards

Matthew Phillips

Matthew / Nick,

Following from our conversation over a week ago, can I please have an update as to where we stand with the assessment as I know our client is keen to get this signed off.

If needs be I can make the assessment based on Nicks measurements if required (as discussed with Nick). But we really need to get this resolved ASAP for our client.

Kind Regards
John Ashe
