

The Occupier

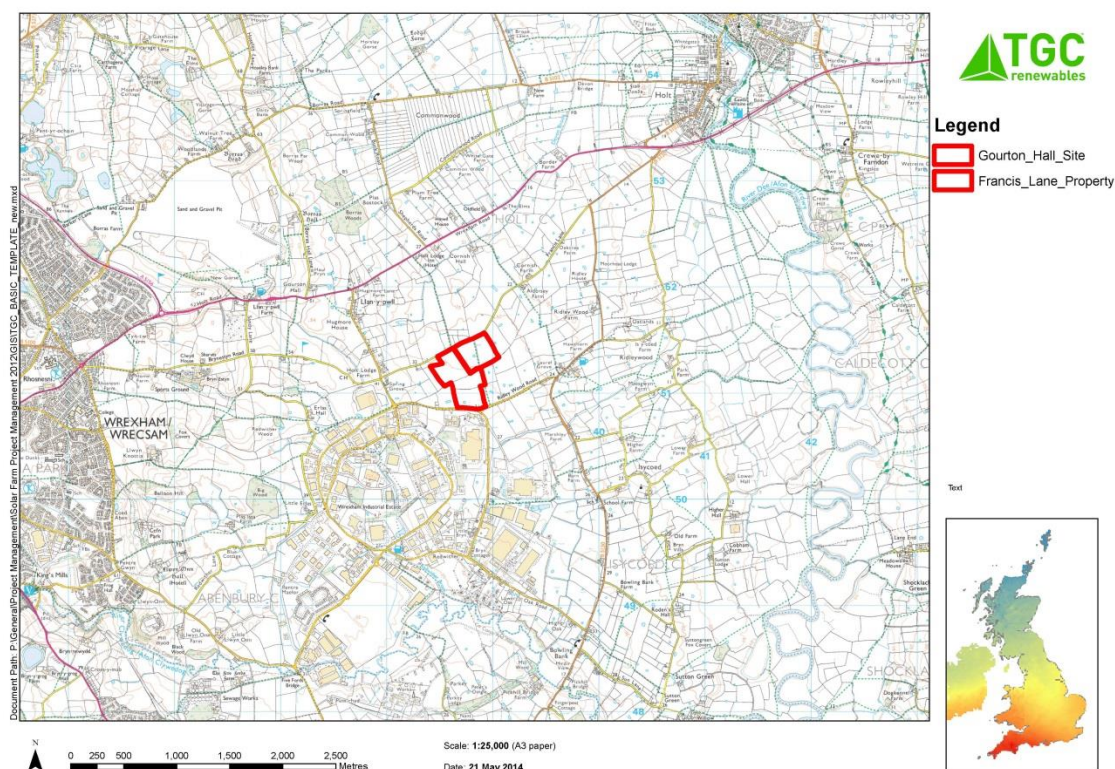

23rd May 2014

Dear Sir or Madam,

Invitation to a Public Consultation Exhibition for two proposed solar PV farms on land on the south side of Francis Lane, Holt

Date: Tuesday 10th June 2014
Time: 3:00pm until 7:00pm
Location: Isycoed Village Hall, LL13 9RN

We are writing to invite you to a public exhibition we are holding in relation to the potential development of two solar PV farms on land on the south side of Francis Lane, Holt. The proposed sites are shown below:

The event will be informal, and will provide an opportunity for you, as member of the local community, to learn more about the proposed development, discuss the proposals with TGC's staff and engage in the pre-application consultation process.

TGC Renewables is a British renewable energy company with a track record of working with local farmers, landowners and investors to increase the amount of electricity produced from renewable sources such as solar power. To date, we have consulted and engaged with many local communities across the UK, resulting in the delivery of a number of successful renewable energy projects.

As a company, we are committed to helping the UK make a responsible move towards a cleaner, greener future for everybody, both on a local and national scale, and we believe that this site has the scope to contribute to that whilst complying with planning policy and guidance. TGC also propose a Community Benefit Fund of £1,000 per installed MW on the site, payable to the Parish Council for the first ten years of the project's operation irrespective of the Parish Council's support or otherwise for the project.

We look forward to meeting you at the exhibition on 10th June 2014. If you are unable to attend but have questions that you would like to ask, please do not hesitate to contact me.

Yours faithfully,

Roy Amner

Director
