Hi philip

The pool area air environment will be looked after by a special domestic rated air handling unit specially designed for pool conditions within domestic areas that require clean air omit and very low noise.

The external louvered grille will have a fresh air and extract section which will connect onto the air handling unit via ducting internal to our demise and their shall be a specially manufactured inline noise attenuation.

The vent shall not be noticeable from any sense other than sight.

Kind Regards

Omar Gomez Evans

Dear Omar,

I am preparing a report to go before the Planning Committee for your applications. One of the matters that has arisen is the new louvered ducting for the ventilation of the pool room. Can you confirm for me how this will work. Will it be connected to the pool plant i.e. will it vent air via pump or is it just a ventilation panel that allows the free flow of air.

A concern has arisen due to the proximity of the vent to the window opening of the neighbouring property and I need to ensure that I have given this matter full consideration. Your assistance would be appreciated.

Regards

Philip
