# THE CODE FOR SUSTAINABLE HOMES

## INTERIM CERTIFICATE

(Issued at the Design Stage)

**Certificate Number: STRO007308-DS-201410105848343**

**Score: 59**

### What Your Code Star Rating Means

|                |       |       |       |       |       |        |
|----------------|-------|-------|-------|-------|-------|--------|
| Combined Score | 36-47 | 48-56 | 57-67 | 68-83 | 84-89 | 90-100 |
| Stars          | 1     | 2     | 3     | 4     | 5     | 6      |

The Code for Sustainable Homes considers the effects on the environment caused by the development and occupation of a home. To achieve a star rating a home must perform better than a new home built to minimum legal standards, and much better than an average existing home.

### How this home scored

| Category              | Percentage of Category Score attained |                        |    |    |    |    |    |    |    |    |     |  | What is covered in the category                                                                      |
|-----------------------|---------------------------------------|------------------------|----|----|----|----|----|----|----|----|-----|--|------------------------------------------------------------------------------------------------------|
|                       | 0                                     | 10                     | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 |  |                                                                                                      |
| Energy                | 48                                    | <div><div></div></div> |    |    |    |    |    |    |    |    |     |  | Energy Efficiency and CO2 Saving measures.                                                           |
| Water                 | 83                                    | <div><div></div></div> |    |    |    |    |    |    |    |    |     |  | Internal & external water saving measures.                                                           |
| Materials             | 21                                    | <div><div></div></div> |    |    |    |    |    |    |    |    |     |  | The sourcing & environmental impact of materials used to build the home.                             |
| Surface Water Run-off | 100                                   | <div><div></div></div> |    |    |    |    |    |    |    |    |     |  | Measures to reduce the risk of flooding and surface water run-off, which can pollute rivers.         |
| Waste                 | 62                                    | <div><div></div></div> |    |    |    |    |    |    |    |    |     |  | Storage for recyclable waste & compost. Care taken to reduce, reuse/recycle construction materials.  |
