YOUR COMMENTS ON THE CASE

Please provide your representation below.

To whom it may concern,

As a consultant ecologist, I suspended my business and staff in Aug 2013 order to educate and fight the abomination that is Fracking. I am very well versed in the processed of fracking having personally visited a frack-field in Qld, Australia in 2011, I have also spent time a various anti-fracking camps within the UK, meeting many leading experts in the field.

The entire industry is based on deceit, the USA overestimated its shale gas reserves by 96% in order to secure funding, and many companies have gone bankrupt. See 'the list of the harmed' from Pennsylvania for some first-hand accounts of the death and destruction fracking has caused to local communities.

Here in Wales, we have the potential to produce 100% of our electricity from renewables, and an excess for exportation, why embrace this proven environmentally destructive technique? Todays

YOUR COMMENTS ON THE CASE (Continued)

fracking report (11/08/14) from the government, just shows how opaque the industry really is, with large parts of the facts redacted.

From the Telegraph today: 'The extent to which the report has been blacked out is almost paranoically Putinesque. Some 58 passages appear to have been redacted in just 13 pages, entirely emasculating some sections. Three paragraphs out of six seem to have been cut from the section on effects on house prices, two out of four from the one on those on local services.' If it is so safe, what do they have to hide?

Do the right thing, say no to fracking. WE will fight you all the way should you decide to please yourselves and not the people you are suppose to represent.

yours sincerely

Paul Derbyshire BSc MIEEM
